The first 296.541 sats are in your piggy bank!

Your account has been verified and your first transaction was processed. We'll show you exactly how this happened:

*[1] bittr does not charge subscription fees or take a cut in your gains, we therefore charge a fixed fee of 1.5% on incoming funds, transparency we call it! [2] Your bitcoin was bought 2 minutes ago, which was as close as possible to when we received your money. We only send out bitcoin once per hour, to save on bitcoin mining fees. [3] This fee does not go to bittr but directly to the bitcoin miners. Due to the decentralized nature of the bitcoin network, miners have to be incentivized (partially with transaction fees) to keep the network secure.*

Your bank transfer was received with deposit code **48IYNSB6PV62** from bank account **ES9114650716511718105138**. The deposit code, your bank account and the bitcoin address provided by you are now attached together. **It is therefore not possible to use the same deposit code from a different bank account (even if it is in your name).** Incorrect funds will be denied, not converted into bitcoin and returned to the sender. We do this to protect your own safety as well as to avoid potential fraud.

If you would like to buy bitcoin to a different address or from a different bank account, simply [register again](#).
